

This is a sample referral letter to be used in sessions for the triage team to inform case based discussions and practice use of the triage and referral guidance. We suggest that these are used in group activities with a facilitator who has experience of paediatric musculoskeletal clinical practice.

I would be grateful if you could see this child who at eleven weeks of age at the eight-week examination was noted to hold the left foot in the valgus position, the foot will straighten on manipulation but the mother has noticed this as an almost constant position.

I would be grateful for your assessment here.

There is no other significant past medical history.
